Fuzion Cart | IONM - EEG - EMG

CADWELL® **Fuzion Cart** IONM - EEG - EMG

Neuro Diagnostic Equipment

Designed to
be used with
Sierra Summit,
Arc Essentia and
Arc Apollo+ systems
while supporting
different
configurations

Fuzion Cart | IONM - EEG - EMG

The Fuzion Cart supports a large number of optional accessories allowing it to set up with multiple product configurations as per user needs.

Fuzion Cart and Accessories

SD Part Number	Description
9500052	Fuzion Cart light-duty (For laptop, All in one computer)
9500053	Fuzion Cart heavy-duty (For Desktop SFF)
9500055	Monitor Mount (supports VESA mount)
111214-000	Keyboard Tray with Mouse Pad
111218-000	Arm Mount
111210-000	Small Shelf
111209-000	Large Shelf
111217-000	Computer Bracket for Large Shelf
111208-000	Accessory Bin
111212-000	Storage Basket
111215-000	Footswitch Holder
111211-000	Tripp-Lite Power Strip Holder
291228-000	Tripp-Lite Med Grade Power Strip (4 US sockets)
111213-000	Isolation Transformer Bin
9510011	Isolation Transformer 800VA 110V / 220V Kit for Fuzion Cart

Base configuration
(inc. One bin, one large shelf,
two arm mounts)

Monitor Mount

Keyboard Tray

GCX Cart

EMG

The GCX EMG Cart is the first cart on the market to provide a seamlessly integrated EMG and Neuromuscular Ultrasound solution

Features

- The worksurface integrates the Sierra Summit base unit, ultrasound probe holders and cable hooks, built in holders for bottles of ultrasound and conductive gel and side pockets on the left and right side of the cart.
- The EMG Cart uses high quality VHRC Series cart line components from GCX
- Ergonomic front handle making for easy cart positioning.
- The cart comes standard with one mouse shelf, upgradeable to two mouse trays - both sides.
- The EMG cart supports Laptop, Small Form Factor, Mini PC, or All-in-One computer configuration.
- Flexible side-to-side amplifier arm mount positioning.
- The EMG Cart can be equipped with either a 2 or 12 channel Sierra Summit amplifier arm and supports two different monitor mounts.
- Arm mount-internal cabling provides excellent cable management.

Options

System Type:	Sierra Summit

A3 Cart Arc EEG

EEG

Lightweight, versatile
mobile workstation
that is designed to
work with Cadwell's Arc
EEG equipment
and accessories

A3 Cart shown with Apollo+ and Arc EEG software

Features

The A3 Cart is engineered to optimize space without sacrificing functionality. The A3 Cart standard configuration includes a computer and monitor (size and type depend on configuration), tilt and swivel monitor mount, slide-out keyboard and mouse trays, lower bin, work surface, rear handle, rear wire basket with cable hooks, Isolation Transformer or Uninterruptible Power Supply (UPS), and work surface with a removable supply drawer.

- Height adjustment for user comfort while sitting or standing
- Lightweight 64 in / 163 cm column and base for ease of maneuverability
- Small footprint for space-constrained environments without compromising stability
- Configured with a single or dual monitor mount
- Optimal storage space
- Easy access to cables and devices

System Type: Arc EEG systems: Apollo+ 32, Apollo+ 64, Essentia systems and Zenith

Computer Type: Small form factor, all-in-one (up to 27")

E3 Cart Arc EEG

EEG

Designed to be a mobile workstation that is ergonomic with optimal shelf and storage space

Removable Supply Drawer allows users to store and transport individualized supply sets.

Features

The E3 Cart is designed to be a mobile workstation that is ergonomic with optimal shelf and storage space.

The E3 cart can be configured with the Isolation Transformer or Tripp Lite UPS. The E3 cart has plenty of shelf space for additional accessories commonly used in a sleep lab, such as a CPAP, Transcutaneous CO2 monitor and a EtCO2 monitor.

- Height adjustment for user comfort while sitting or standing
- Lightweight 64 in / 163 cm column and base for ease of maneuverability
- Small footprint for space-constrained environments without compromising stability
- Configured with a single or dual monitor mount
- Optimal storage space
- Easy access to cables and devices

Symbiotic Devices was founded in 2012 on a passion not only for neuroscience and neurotechnology, but also to provide clients with uncompromised quality, reliability and assistance. Striving to contribute to a sustainable successful research and clinical sectors across Australia and New Zealand, Symbiotic Devices aims to balance quality, accessibility and customisation.

We know that each neurophysiology project will present unique challenges, and our wide range of partners means we are able to provide customised and dynamic solutions to fit our client's needs.

First partnering with Brain Products, EasyCap and Rogue Research, Symbiotic Devices now proudly represents CED, Deymed, Cadwell, NeuroConn/NeuroCare, Rhythmlink, Pearl Technology and VPIxx.

If you want the best solutions for your neuroscience and neurophysiology needs, you can trust Symbiotic Devices to provide the highest quality equipment, applications and support while contributing to a sustainable and ethical future for neuroscience practices.
