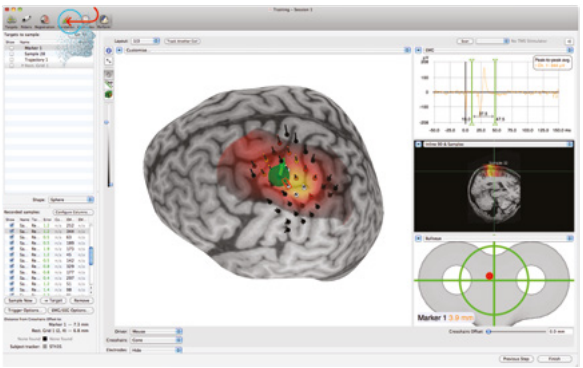
TMS - TDC & Accessories

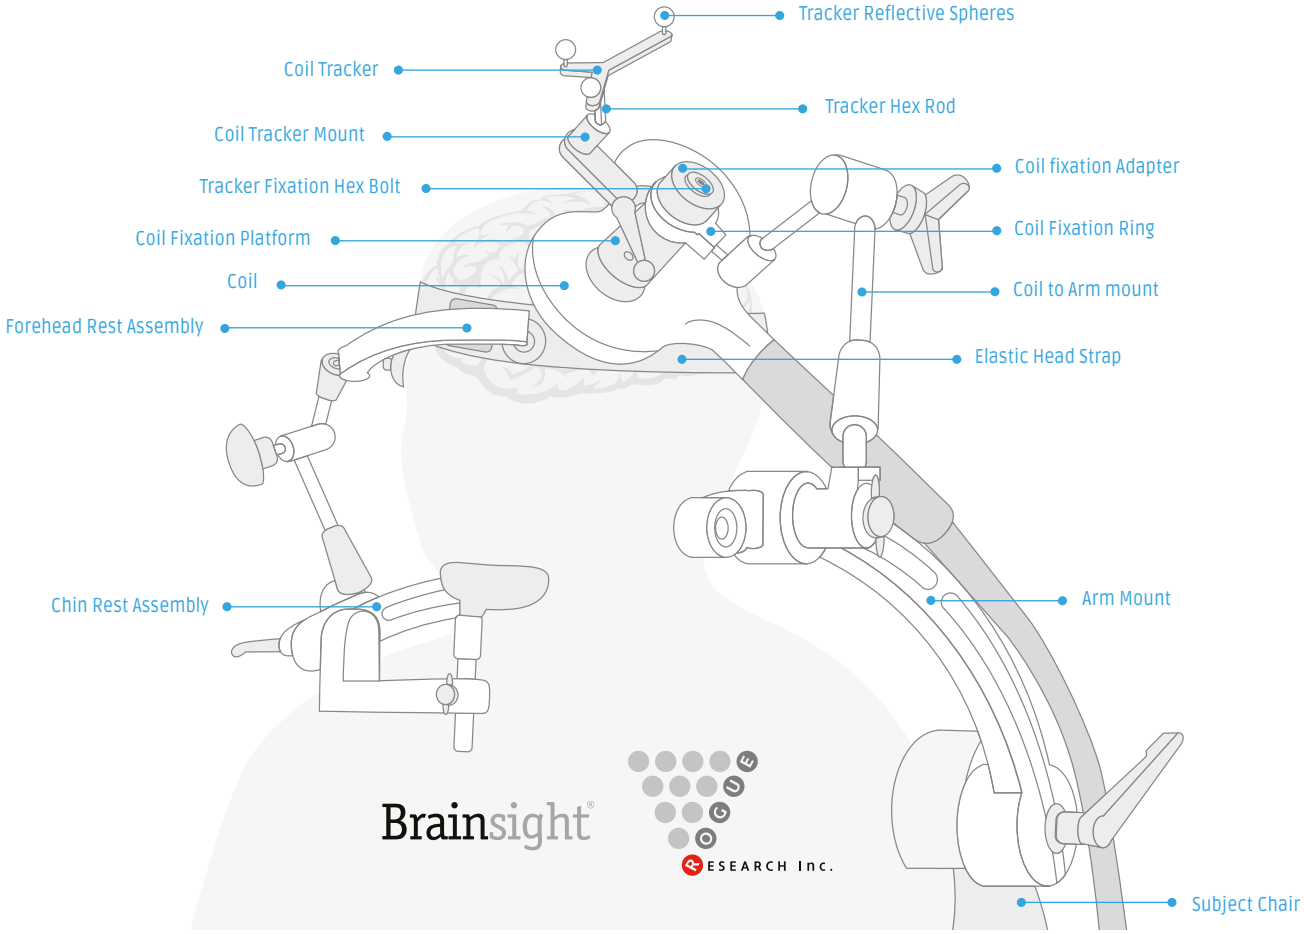
Brainsight®
TMS

The world's leading neuronavigation system

- Brainsight TMS works with any coil from any manufacturer
- Allows flexible, easy coil calibration
- Define target based on anatomy, MNI or Talairach coordinates, MRI overlay, previous TMS session
- Links to TMS device via TTL trigger and serial port
- Integrated 2-channel EMG for mapping studies
- Simpler coil calibrations
- New subject-Image registration refinement step
- At each TMS pulse, Brainsight™ can record:
  Coil position and orientation, coil status (on supported TMS models), intended target, positioning error, distance to target, EMG response, EEG response (when using NEUROPRAX EEG), NIRS optode locations, positioning error, distance to target, EMG response, EEG response (when using NEUROPRAX EEG), NIRS optode locations.



Brainsight includes Live EMG Display and 3D CAD import for realistic illustrations.



TMS Examination Chair and Accessories

SD Part Number	Description
KITHCH0401	· 4th Generation Subject Chair w. coil support arms · Rotating & height adjustable · Fully upright or reclined · Integrated leg supports · Retractable arm rests · 2 Adjustable accessory arcs · 2 Articulated coil arms · Left-right reversible chin and forehead rest
CHAIR0401	· Chair with base · Rotating & height adjustable · Fully upright or reclined · Integrated leg supports · Retractable arm rests
VBAR0401	· Vertical bar w. damped arc · Height adjustable vertical bar w. dampened starburst · Sliding arc w. slots for accessory block and starburst end · Height locking sleeve
ACCBLK0401	Accessory block for arc
CHFORST0401	Chin and forehead rest
ARMTMS0501	Articulated arm w. threaded end (for custom use)
CFIXMAG0101	TMS coil to arm mount for Magstim 9925 Coil. Magstim 9925 or Alpha coil. Includes coil tracker mount.
CFIXMAG0201	TMS coil to arm mount for Magstim 3530 Coil. Magstim cooled coil w. air extractor. Includes coil tracker mount.
CFIXMAG0301	TMS coil to arm mount for Magstim 3190 Coil. Known as Remote coil or 2nd gen coil. Includes coil tracker mount.
CFIXMAG0401	TMS coil to arm mount for Magstim 3910 Coil. Also known as air-film coil. For TRAAMAG0501 for tracker fixation.
CFIXMAG0501	TMS coil to arm mount for Magstim 4102 Coil. Also known as D702 coil
CFIXUNI0101	Universal TMS coil to arm mount (flat). Attaches to straight handles (1-1.5" diam). Includes coil tracker mount
CFIXUNI0201	Universal TMS coil to arm mount (angled). Attaches to straight handles (1-1.5" diam). Includes coil tracker mount
ARMTMS0101	TMS Coil Arm with accessory block For Gen 1-3 frames

BrainSight Accessories

SD Part Number	Description
CALTOL0101	Calibration Block w. 3 Spheres
SPHENDI0101	NDI Passive Spheree
HDTNHX0101	Elastic Head Strap, w. Subject Tracker Hex Mount
HDTNHX0201	Clear Lensed Glasses, w. 2 Subject Tracker Hex Mounts
PNTPAS0101	Passive Pointer w. 3 Passive Spheres
SDRR-NL0010	Brainsight® Subject Tracker, Adhesive
SDRR-NL0011	Brainsight® Subject Tracker, Adhesive
TRKNHX0101	Subject Tracker w. 3 Passive Spheres
TRKSHX0201	Secondary TMS Tracker w. 3 Passive Spheres
SDRR-NL0001	Hex Rod for Coil Tracker
SDRR-NL0002	Subject Tracker Hex Rod
SDRR-NL0003	Straight Hex Rod
SDRR-NL0004	Coil Tracker Hex Rod

Coil Tracker Fixation Accessories for BrainSight TMS Neuronavigation

SD Part Number	Description
CRGMAG0101	TMS Tracker Coil Ring 2.5 cm for Custom and BI Magstim coils Magstim round handle (custom coils)
CRGMPRO201	TMS Tracker Coil Ring 3.2 cm for MagPro B65 A / P (active / sham) coil
TRAAMAG0301	Plastic Tracker Fixation Disk for Magstim 9925 Coil
TRAAMAG0401	Plastic Tracker Fixation Disk for Magstim 3190 Coil Known as Remote coil or 2nd gen coil
TRAAMAG0501	Plastic Tracker Fixation platform for Magstim 3910 Coil Also known as air-film coil Should be installed by qualified person
TRAAMAG0601	Plastic Tracker Fixation Platform for Magstim 3530 Coil Also known as air-cooled coil (air extractor model). Replaces CRGMAG0201
TRAAMAG0701	Plastic Tracker Fixation Disk for Magstim 4102 Coil Also known as D70-2 Coil
TRAAMAG0801	Plastic Tracker Fixation Disk for “new” Magstim 3190 Coil Remote coil with new light blue shell Also suitable for Magstim 4565 MT coil

CRGMAG0101

CRGMPRO201

Calibration Jigs for BrainSight TMS Neuronavigation

SD Part Number	Description
CALBMAG0101	Calibration Jig for Magstim 9925 Coil Also known as Alpha Coil
CALBMAG0201	Calibration Jig for Magstim 3190 Coil Also known as 2nd gen Coil, or Remote coil
CALBMAG0301	Calibration Jig for Magstim 3910 Coil Also known as Air Film Coil - AFC
CALBMAG0401	Calibration Jig for Magstim 3530 Coil Also known as Air-Cooled Coil Note that due to inconsistent rubber gasket on coils, fit may be imperfect
CALBMAG0501	Calibration Jig for "New" Magstim 3190 Coil Remote Coil with new light blue shell
CALBMAG0601	Calibration Jig for Magstim 4565 Coil Remote coil with new light blue shell & Rubber bottom coating Also known as the MT Coil supplied with clinical rapid systems
CALBMAG0701	Calibration Jig for Magstim 9902 Coil Also known as the Double-cone Coil
CALBPRO0101	Calibration Jig for MagPro CB60 Coil
CALBPRO0201	Calibration Jig for MagPro Cool-B65 Coil
CALBDEY0101	Calibration Jig for Deymed non cooled Coil
CALBDEY0201	Calibration Jig for Deymed cooled Coil
CALBUNIV0101	Calibration Jig for Custom Coil Sliding registration pins

Calibration Adapter for Magstim 9925

Calibration Adapter for Magstim 3190

Calibration Adapter for Magstim 3910

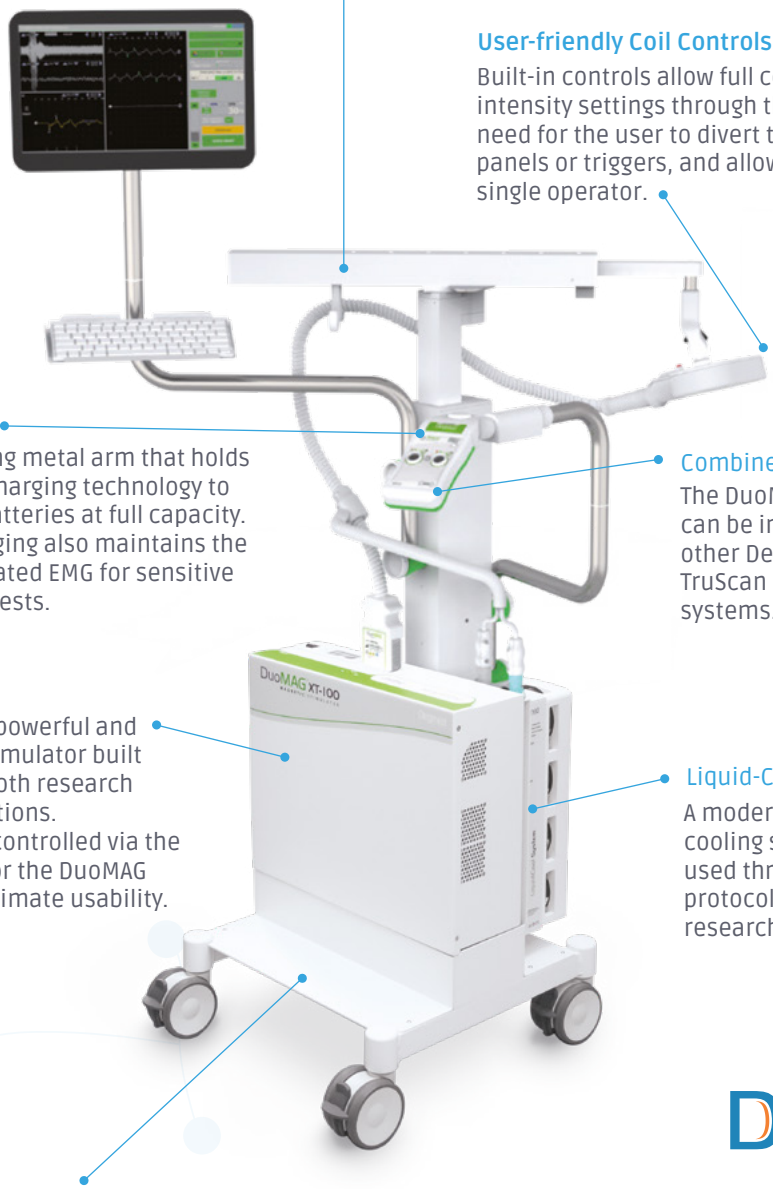
Calibration Adapter for Magstim 4565

DuoMAG® XT-100
MAGNETIC | STIMULATOR

Touch-Screen Interface
Combined with intuitive software for ease of use. Built on a Windows platform, allowing full integration for third-parties products such as neuro-navigation.

Counter-Balanced Coil Holder
The counter-weight balanced positioning arm and auto-locking position greatly reduces the effor required to find and secure the placement of coils.

User-friendly Coil Controls
Built-in controls allow full control over stimulation and intensity settings through the coil handle, removing the need for the user to divert their attention to external panels or triggers, and allowing the system to be used by a single operator.



Intelligent Charger
Built in to the rotating metal arm that holds the uses inductive charging technology to keep the headbox batteries at full capacity. This method of charging also maintains the optical battery-operated EMG for sensitive neurophysiological tests.

Combine with EMG/EEG
The DuoMAG family of stimulators can be integrated seamlessly with other Deymed systems, such as the TruScan EEG and TruTrace EMG/MEP systems.

Stimulator
The DuoMAG XT is a powerful and fexible magnetic stimulator built for ease-of-use in both research and clinical applications.
The system can be controlled via the coil controls, a PC, or the DuoMAG touch-screen for ultimate usability.

Liquid-Cooling System
A modern and powerful liquid cooling system allows the coil to be used through the most intensive protocols during clinical and research protocols.

Deymed DIAGNOSTIC

Special Developed Cart
Designed with robustness and space in mind, the carts small overall footprint, integral coil arm and large easy roll wheels means the DuoMAG XT is to fit into the most demanding environments.

The MagTower is an innovative, counter weight balanced coil holder for TMS. The MagTower significantly lowers the weight of the coils for use in any scenario where the user may otherwise struggle with maintaining difficult coil positioning, such as finding a motor threshold. Locking the cold position is achieved through the click of a button, and the touchscreen interface offers protocol design and control along with MEP visualisation of EMG signal.

Advantages of DuoMAG rTMS

Intelligent Charging
Deymed's new ultra-low capacitance induction charging technology guarantees the highest quality EMG signal possible for sensitive neurophysiological tests, while also keeping the system's batteries full.

Powerful System
Capable of intensive high frequency protocols for the most complex clinical, psychiatric and research uses, the DuoMAG XT-100 can reach 100 pps at 47% intensity.

Multi-system Integration
Integration with Deymed's clinical EMG and EEg amplifiers allows multiple configurations of EMG/MEP or EEG signals to be displayed. Deymed amplifiers are designed to eliminate all TMS stimulation artefacts.

Touch-Screen Interface
Combined with intuitive software for ease of use. Built on a Windows platform, allowing full integration for third-parties products such as neuro-navigation.

Session and Patient Report
PDF reports can be generated for specific patients or sessions. 'Patient Report' shows a list of performed sessions, while 'Session Report' shows detailed information on performed stimulation protocols or MEP.

Counter-balanced Coil Holder
The MagTower cart with its counter-weight balanced positioning arm and auto-locking position greatly reduces the effor required to find and secure the placement of coils.

Cooled Coil
Deymed coils with double air-cooled fans or liquid-based systems allow for even the most intense TBS protocols to be used for extended periods without over-heating the system.

Custom Protocol Editor
The Custom Protocol Editor allows the user to save any conceivable protocol design, including customisable stimulation trains,Theta Burst Stimulation (iTBS-cTBS) protocols and changing stimulation intensities.

Deymed DIAGNOSTIC DuoMAG® XT MAGNETIC | STIMULATION

Magnetic Stimulation Coils for DuoMAG XT

SD Part Number	Description	
70BF-LQC 60BF-LQC	Butterfly Coil 70mm and 60mm with liquid cooling Typical use: Focused long-term cortical stimulation, mainly for rTMS. Requires liquid-cooling unit	
70BFX-LQC	Butterfly overlapping Coil 70mm Typical use: Focused long-term cortical stimulation, mainly for rTMS. More comfort for the patient, due to coil design. Requires liquid-cooling unit	
90BFVT-LQC	Butterfly V cone Coil 90mm and 120° angled surface Typical use: Deep stimulation. Requires liquid-cooling unit	
70BF - Cool	Butterfly Coil 70mm with cooling fans Typical use: Focused long-term cortical stimulation, mainly for rTMS. Air Cooling Option as Placebo.	
70BF	Butterfly Coil 70mm Typical use: Focused stimulation, mainly for rTMS. Option as Placebo.	
50BF	Butterfly Coil 50mm Typical use: Precision focused stimulation, mainly for rTMS.	

* All coils have controls of intensity and stimulation

DuoMAG XT Magnetic Stimulation Coils

SD Part Number	Description
120BFVT	Butterfly V Cone Coil 120mm with 100° angled surface Typical use: Deep spinal stimulation.
50BFT	Butterfly T-Shaped Coil 50mm Typical use: Precisely focused stimulation, for rTMS.
30BFT	Butterfly T-Shaped Coil 30mm Typical use: Precisely focused stimulation.
100R	Round Coil 100mm Typical use: Stimulation of peripheral nerves or cortical stimulation.
125R	Round Coil 125mm Typical use: Spinal stimulation.

* All coils have controls of intensity and stimulation

neuroConn DC-STIMULATOR PLUS

Measuring and Modulating Brain Activity

Programmable direct and alternating current stimulator

The DC-Stimulator PLUS is a stimulator for use in scientific research that provides a stimulation with weak currents, either direct or alternating, (transcranial Electrical Stimulation tES), within non-invasive Interventional Neurophysiology. The electrical charge and current density applied through a constant current source are far below the threshold for releasing a stimulus. Depending on the duration, the used current, the current density, and the frequency the stimulation has a modular effect on existing neuronal elements by either activating or inhibiting cortical activity.

tDCS-PLUS System

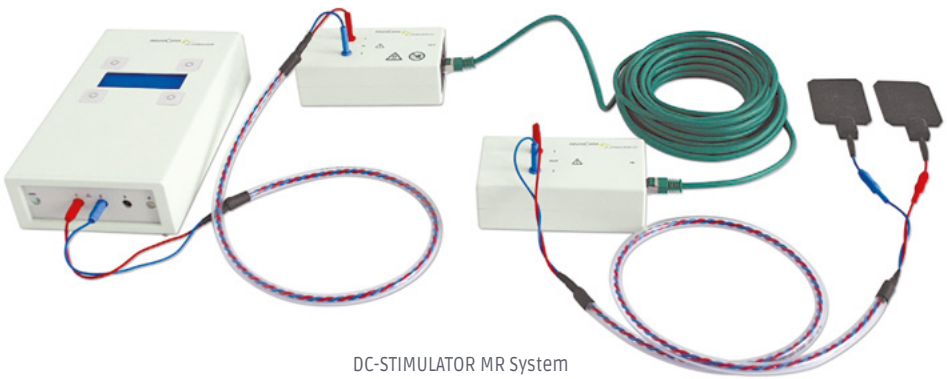
SD Part Number	Description
301020	DC-Stimulator Plus, 1-channel, unipolar, bipolar, Instrument

Options / Accessories

301310	Set up study mode (blind operation), active and pseudo-stimulation (DCSM)
302010	MRI module for DC-Stimulator Plus, starter set / 35 MR, complete
303010	Trigger IN, connection of external Triggers, 1-channel (DCS, DCS Plus)
303011	Trigger Out, to control external devices, 1-channel (DCS Plus only)
303012	Signal Out tACS-EEG NP, Signal Output for connecting to NEURO PRAX® TMS / TDCS systems only (DCS Plus only)
303013	Signal Out tACS-EEG, Signal Output for connecting to EEG systems (DCS Plus only)
303014	Signal Out Monitor, Signal Output (DCS Plus only)

tDCS-PLUS System

SD Part Number	Description
303020	Schedule, statistic mode for time dependent programming and logging (DCS Plus only)
303030	Remote, stimulation control via externally generated signals (DCS Plus only)
303040	Trigger MC, Trigger output to control external devices, 4-channel, optical (DCMC only)
303050	External Trigger Generator, linking of 2 or more Stimulators with Trigger IN (DCS, DCS Plus)
303070	Trigger Output Module DCMC, 8 channels, optical to electrical (BNC), 5m cable, transport case
304020	Study, study mode (blind operation), active and pseudo-stimulation (DCS, DCS Plus)
304041	Special Software Version (DCS MR) - 2mA@MRI
304050	MATLAB / .NET library for control of the DC-Stimulator MC
304060	MATLAB/.NET function for generating arbitrary stimulation waveforms for the DC-Stimulator MC
301030-21	DCS/DCMC MR Stimulator Cable
301030-22	Box Cable for DCSMR/DCMCMR, 20m
301030-23	DCS/DCMC MR Electrode Cable
301030-24	Box Cable for DCSMR/DCMCMR, 10m
301031-23	DCS/DCMC MR Electrode Cable 4 x 1 (Common Cathode)
301032-23	DCS/DCMC MR Electrode Cable 2 x 1 (Common Cathode)



DC-STIMULATOR MR System

DC-Stimulator Mobile

SD Part Number	Description
301200	DC-Stimulator Mobile, Set Of Devices "MINI", (1 x APCS, 1x PCD, 3 x EDSM, Software, Case)
301201	DC-Stimulator Mobile, Set Of Devices "MINI C", (1 x APCS, 1x PCD, 3 x EDSM, 1x COD, Software, Case)
301210	DC-Stimulator Mobile, Set Of Devices "BASIC", (2 x APCS, 2 x PCD, 6 x EDSM, Software, Case)
301211	DC-Stimulator Mobile, Set Of Devices "BASIC C", (2 x APCS, 2 x PCD, 2 x COD 4 x EDSM, Software, Case)
301220	DC-Stimulator Mobile, Set Of Devices "STIM EXTENSION 2" (2 x APCS, 4 x EDSM, Case)
301221	DC-Stimulator Mobile, Set Of Devices "STIM EXTENSION 1" (1 x APCS, 2 x EDSM, Case)
301230	DC-Stimulator Mobile, Set Of Devices "TIME EXTENSION" (4 x EDSM, Case)
301240	DC-Stimulator Mobile, Set Of Devices "STIM-ALONE EXTENSION 2" (2 x APCS, 2 x EDSM, 2 x COD, Case)
301241	DC-Stimulator Mobile, Set Of Devices "STIM-ALONE EXTENSION 1" (1 x APCS, 1 x EDSM, 1 x COD, Case)

Options / Accessories

301330	CE-compliant modification of DC-Stimulator Mobile (tDCS, up to 30min, max. 8 stimulation sequences)
301331	NON-CE compliant modific. of DC-Stimulator Mobile (CE0123 will be removed, tACS and tRNS possible, duration > 30min, max. 8 stimulation sequences)

neuroConn

Transcranial electrical stimulation
for use in clinical routines

The DC-STIMULATOR MOBILE is delivered as a set of devices. The basic package can be supplemented as needed for different therapy situations.

301210 as shown

neuroConn DC-STIMULATOR MC

Programmable, multi-channel direct, alternating and random noise current stimulator

The **DC-Stimulator MC** is a stimulator for use in scientific research that provides a stimulation using weak direct or alternating current (transcranial Electrical Stimulation tES) within non-invasive interventional Neurophysiology.
The multi-channel **DC-Stimulator MC** allows computer-controlled, full-band stimulation from independent electrical sources using any desired signal type in the range of 0-1,000 Hz and currents of between 50-4,000 µA with a freely adjustable phase.
The **DC-Stimulator MC** can also be used during functional magnetic resonance imaging (fMRI) and, in addition, can be combined with the NEURO PRAX® TMS/tES allowing full-band DC-EEG to be recorded during multi-channel tES.

DC-Stimulator MC, MultiChannel

SD Part Number	Description
301050	DC-Stimulator MC, 4-channel, unipolar, bipolar, AC, Panel PC, equipment, complete
301060	DC-Stimulator MC, 8-channel, unipolar, bipolar, AC, Panel PC, equipment, complete
301070	DC-Stimulator MC, 16-channel, unipolar, bipolar, AC, Panel PC, equipment, complete

Options / Accessories

302011	MRI module for dual-channel stimulation with 2 DCSMR / DCSP devices (1 DCSMR minimum)
302020	MRI module for DC-Stimulator MC, 4-channel
302021	MRI module for DC-Stimulator MC, 8-channel
302022	MRI module for DC-Stimulator MC, 16-channel
303000	Power Supply Extension, rechargeable, not MR compatible (for DC-Stimulator MC systems)

TDCS Accessories

NOTES

TMS SOLUTIONS

Symbiotic Devices can assit you with selecting the right equipment for your analysis and provides training and support.

Symbiotic Devices was founded in 2012 on a passion not only for neuroscience and neurotechnology, but also to provide clients with uncompromised quality, reliability and assistance. Striving to contribute to a sustainable successful research and clinical sectors across Australia and New Zealand, Symbiotic Devices aims to balance quality, accessibility and customisation.

We know that each neurophysiology project will present unique challenges, and our wide range of partners means we are able to provide customised and dynamic solutions to fit our client's needs.
First partnering with Brain Products, EasyCap and Rogue Research, Symbiotic Devices now proudly represents CED, Deymed, Cadwell, NeuroConn/NeuroCare, Rhythmlink, Pearl Technology and VPixx.

If you want the best solutions for your neuroscience and neurophysiology needs, you can trust Symbiotic Devices to provide the highest quality equipment, applications and support while contributing to a sustainable and ethical future for neuroscience practices.
